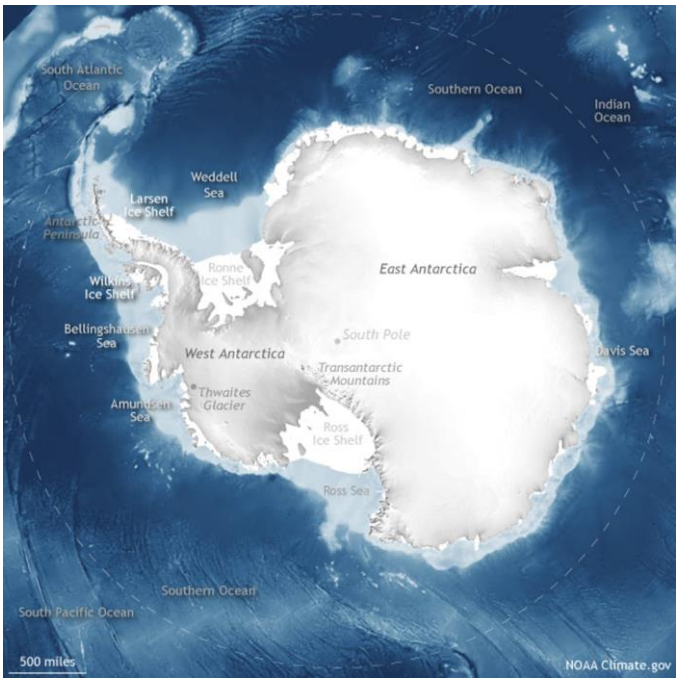
Geography week 2: Suggested for Tuesday 19th January 2021

This week's continent is…..

ANTARTICA.



REMEMBER: You must complete Tasks 1 and 2 every week. Then choose at least one other activity.

Task 1: Research key questions.

1. Where is Antarctica? Can you locate it on a globe?
2. What is the climate like?
3. What animals do they have there?
4. How big is the continent?
5. How many people live there?
6. Find out about one tourist attraction.

Task 2: Imagine you were planning a holiday to this continent. What would you pack? Draw and label at least 5 items inside your suitcase. **Challenge:** Explain why you would take those items.

Other tasks: Choose **at least one** (you can do more or all of them if you would like to)

- Research Ernest Shackleton (a famous explorer) and create a fact file on him.
- Choose an animal that lives in Antarctica. Draw it and label it with key facts. How does it survive in such harsh conditions?
- Why is the ice melting in Antarctica? How do you feel about this?
