

## Year 1 online science learning

11<sup>th</sup> January 2021

Below are the science tasks that we have set for the week. We hope that you enjoy them!

Lesson 2

How do things move? (push, pull, bounce, stretch, roll, twist, turn).

Recap the meaning of each word - children to show physically with own bodies.

**If you haven't got any cars then you could use balls or marbles.**

What makes a toy car work? Explore how toy cars move. Can they move in more than one way? Sort cars according to movement. Set challenges e.g. How can you make it go faster? How can you stop it? Why does it slow down? Can you make it swerve? What did you have to do to make the cars speed up, slow down, etc.

Draw and label your car/ball or other object. Write a sentence explaining how it moves.

**Challenge**- Write about how the object can be moved in more than 1 way.

### **WEEKLY ASSIGNMENT:**

WEEKLY ASSIGNMENT: Please upload a small selection of photos (Max 5) to show your learning from this week. As work is marked for accuracy as part of each online lesson, feedback from school will be based on the strategies used.

Work needs to be submitted up until 4pm on Sunday 17th January 2021

Work will be responded to by a teacher throughout the course of the next week.
